Prior to ordering this booklet, now included in the The Improved Martingale Betting System book, also for \$0.99 cents, you are invited to watch a video at youtu.be/FU7J2Gj8wwo that illustrates how this improvement works. Reviewed by one of Amazon.com's top reviewers, John WilliamSon 2100, his critiques can be found in the customer review and comments sections of my booklet titled The Best of All Available Betting Systems that can be found by searching for this title on the web or under the authors name Carlos Turver at Amazon.com. This booklet with another nine can be obtained with the March 16, 2015 edition of The Improved Martingale Betting System. The martingale betting system has been in existence for over two centuries and is the most practical betting system to use when playing the 1 x 1 or 2 x 1 payout propositions. However, as the payouts increase and as the table limits decrease the number of times that a wager can be doubled after every loss becomes limited. As of April 2010, an improvement was officially added to this traditional betting system. When it was first published online, the Martingale-Turver Betting System, U.S. Copyright TXu 1-671-098, had a short life span at www.turverbsystems.com.mx. Having only recently appreciated how valuable this improvement is, two booklets covering this betting system were published on Amazon.com in March, 2014. This new booklet offers additional information as it contains more detailed explanations of how it works and a multitude of tables that can be used in physical and online casinos. To efficiently use this system, players will need to prepare themselves prior to entering a casino: 1. Deciding on the type of bet that will be placed and its payout. 2. Determining the amount of money that will be needed when using the improved martingale betting system. 3. Finding out

the minimum bet requirement and the maximum bet ceiling of the proposition to be played. All of the examples listed start with an original bet of 1 unit. Those who have used the traditional martingale double up after every loss betting system most probably have been stopped by the table limit or by the lack of funds. A high minimum and a low maximum bet table or machine reduces the number of bets that can be placed! Therefore, we think it prudent to start betting with the lowest denomination permitted. A 63 unit bank roll, a 1 unit minimum and a 32 unit bet ceiling, for example, allows for 6 consecutive bets when using the traditional martingale betting system. When any of these bets hit, 1, 2, 4, 8, 16 or 32, a total of 63 units, all previous losses are recovered and a 1 unit profit is made. When using the improved martingale betting system, a 3 x 1 payout, with the addition of 1 unit that brings the total to 64 units, can produce 12 potential wins! As with the traditional martingale, whenever the bets hit all previous losses are recovered and the profits that are made range from 1 to 16 units on 7 of the wins. There are no profits made on the other 5, but all of the previous losses are recovered.
